Summary

Computer Science (Data Science) graduate with hands-on experience in Python, SQL, machine learning, and software development. Built AI and full-stack academic projects using Flutter, Flask, Firebase, and Node.js. Passionate about developing AI-powered applications, automation tools, and scalable backend systems. Seeking entry-level Software Engineer, Python Developer, Data Analyst, or AI Engineer opportunities while continuously expanding expertise in Generative AI and AI automation

Education

B.Tech in Computer Science (Data Science)

Oct 2022 – June 2026

SCMS School of Engineering and Technology

CGPA: 8.00/10

Internship

Machine Learning Internship, ICT Academy

June 2024

- Completed a **4-week Machine Learning Internship** at ICT Academy.
- Performed data preprocessing using Pandas.
- Built and evaluated machine learning models using Scikit-learn.
- Worked with supervised learning techniques on real datasets.

Projects

Bus Pass Management System (Flutter, Node.js, Firebase)

Dec 2024 – April 2025

- Developed a QR-code-based bus pass management platform supporting **three user roles** (Admin, Student, Conductor).
- Integrated Razorpay payment gateway for secure online transactions.
- Built using Flutter, Node.js and Firebase.
- Implemented real-time QR validation and pass status management.

Grocery delivery app

Oct 2024

- Developed a grocery delivery application supporting user authentication, product browsing, cart management and order placement.
- Implemented real-time order tracking and secure payment workflow.

- Designed responsive mobile UI using Flutter

AI-Based Customer Churn Prediction using Convolutional Neural Networks (CNN)

jan 2026

- Developed a Convolutional Neural Network (CNN) in Python to predict customer churn using a dataset of 10,000+ subscription customers (Netflix-based demonstration dataset).
- Performed data preprocessing, feature engineering, model training, and evaluation to improve churn prediction accuracy.
- Built a web application using Flask, Node.js, and Flutter to visualize predictions and provide an interactive user interface.
- Technologies: **Python, TensorFlow/Keras, Pandas, Flask, Node.js, Flutter.**

Skills

Programming Languages: Python,SQL,Java,C++,C,R

Framework & Technology : Flutter,Flask,Firebase,Node.js,Git,GitHub

Data Science : Pandas,NumPy,Scikit-learn,Machine Learning,Data Analysis,Data Cleaning,Data Visualization,EDA

Currently Learning : FastAPI,Generative AI,AI Agents

Certifications

- **Python for Data Science** – Infosys Springboard
Covered Python programming, NumPy, Pandas, data preprocessing, and basic visualization techniques.
- **Workshop on Full Stack Development (Angular)** – ICT Academy of Kerala
Participated in a 3-day hands-on workshop focused on building modern web applications using Angular. (Oct 3–5, 2023)
- **Workshop in Metaverse** – GEC Thrissur
